## **Item 5 Description of Governing Classification and Exceptions (change)**

The terms UFC, OPSL and STCC mean respectively:  
Uniform Freight Classification Tariff UFC 6000-Series.  
Open and Prepay Station List Tariff OPSL 6000-Series.  
Standard Transportation commodity Code Tariff STCC 6001-Series

Except as otherwise provided, this tariff is also governed by the following tariffs:  
IAIS T 8000 Series-Switching  
IAIS T 3000 Series-General Commodities  
IAIS T 6100 Series-Rules  
IAIS Fuel Surcharge T-9003 Series

---

## **Item 15 Explosives and Dangerous Articles**

For rules and regulations governing the transportation of explosives and other dangerous articles by freight, also specification for shipping containers and restriction governing the acceptance and transportation of explosives and other dangerous articles, see Directory of Hazardous Shipping, Materials Descriptions Tariff BOE 6000-Series, issued by the Association of American Railroads, Bureau of Explosives, Agent. On shipments of explosives and other dangerous articles, the 49-Series STCC number must be shown on the shipping document by the shipper.

---

## **Item 50 Method of Canceling Item**

As this tariff is supplemented, numbered items with lettered suffixes cancel correspondingly numbered items in the original tariff or in a prior supplement. Letter suffixes will be used in alphabetical sequence starting with A. Example: Item 50-B cancels Item 50-A in a prior supplement which, in turn, canceled Item 50.

---

## **Item 55 Method of Denoting Reissued Matter in Supplements**

Matter brought forward without change from one supplement to another will be designated as "Reissued". To determine the original effective date consult the supplement in which the reissued matter first became effective.

---

## **Item 65 Demurrage**

This tariff is subject to all rules and charges published in STB IAIS 6004-Series Demurrage Tariff.

---

## **Item 80 Application of Switching Rates or Charges**

IAIS will not absorb any origin or destination switch charges. IAIS will absorb either one empty or one loaded intermediate switch charge at Chicago, IL.

---

## **Item 90 Intermediate Application-Origin**

Subject to the provisions of Notes 1, 2 and 3 below, from any point of origin from which a commodity rate on a given article to a given destination and in a given route is not named in this tariff, which point is intermediate to a point from which a commodity rate on said article is published in this tariff via a route through the intermediate point over which such commodity rate applies to the same destination, apply from such intermediate point to such destination and via such route the commodity rate in this tariff on said article from the next beyond point from which a commodity rate is published herein on that article to the same destination via the same route.

## IAIS 4600-Q

---

Note1: If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this note, if there are two or more "next beyond" points due to branch or diverging lines, eliminate all such "next beyond" points except the point from which the lowest charge is applicable.

Note 2: If the class rate on the same article via the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this item, such commodity rate will not apply.

Note 3: If there is any other tariff a commodity rate on the same article from the intermediate origin point applicable over the same route to the same destination, the provisions of this item are not applicable from such intermediate origin points.

---

### **Item 95                      Intermediate Application-Destination**

Subject to the provisions of Notes 1, 2 and 3 (see Item 95), from any point of destination from which a commodity rate on a given article to a given origin and in a given route is not named in this tariff, which point is intermediate to a point from which a commodity rate on said article is published in this tariff via a route through the intermediate point over which such commodity rate applies to the same origin, apply from such intermediate point to such origin and via such route the commodity rate in this tariff on said article from the next beyond point from which a commodity rate is published herein on that article to the same origin via the same route.

Note1: If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this note, if there are two or more "next beyond" points due to branch or diverging lines, eliminate all such "next beyond" points except the point from which the lowest charge is applicable.

Note 2: If the class rate on the same article via the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this item, such commodity rate will not apply.

Note 3: If there is any other tariff a commodity rate on the same article from the intermediate origin point applicable over the same route to the same destination, the provisions of this item are not applicable from such intermediate origin points.

---

### **SPECIAL RULES AND REGULATIONS - UNLIMITED**

---

### **Item 100                      Returned, Refused or Rejected Shipments**

When a given shipment has reached destination but is refused or rejected and not unloaded and is returned to the original shipping point (for reasons other than carriers error), the return movement will be subject to the same rate and minimum weight, (disregarding an aggregate minimum, if any), that was applied on the inbound move in effect on date shipment is tendered for return, or to the rate normally applicable for such return movement is lower.

Note: Routing for the return movement will be applicable only via the reverse of the route over which the original shipment moved.
