Subject to the provisions of Notes 1, 2 and 3 below, from any point of origin from which a commodity rate on a given article to a given destination and in a given route is not named in this tariff, which point is intermediate to a point from which a commodity rate on said article is published in this tariff via a route through the intermediate point over which such commodity rate applies to the same destination, apply from such intermediate point to such destination and via such route the commodity rate in this tariff on said article from the next beyond point from which a commodity rate is published herein on that article to the same destination via the same route.

Note 1: If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this note, if there are two or more "next beyond" points due to branch or diverging lines, eliminate all such "next beyond" points except the point from which the lowest charge is applicable.

Note 2: If the class rate on the same article via the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this item, such commodity rate will not apply.

Note 3: If there is any other tariff a commodity rate on the same article from the intermediate origin point applicable over the same route to the same destination, the provisions of this item are not applicable from such intermediate origin points.

Item 95 Intermediate Application-Destination

Note 1: If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this note, if there are two or more "next beyond" points due to branch or diverging lines, eliminate all such "next beyond" points except the point from which the lowest charge is applicable.

Note 2: If the class rate on the same article via the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this item, such commodity rate will apply.

Note 3: If there is any other tariff a commodity rate on the same article from the intermediate origin point applicable over the same route to the same destination, the provisions of this item are not applicable from such intermediate origin points.
