NOTE 1: If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this note, if there are two or more “next beyond” points due to branch or diverging lines, eliminate all such “next beyond” points except the point from which the lowest charge is applicable.

NOTE 2: If the class rate on the same article via the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this item, such commodity rate will not apply.

NOTE 1: If the intermediate point is located between two points from which commodity rates on the same article via the same route are published in this tariff, apply via that route from the intermediate point the rate from the next point in either direction which results in the higher charge. In applying this note, if there are two or more “next beyond” points due to branch or diverging lines, eliminate all such “next beyond” points except the point from which the lowest charge is applicable.

To prevent rejection of IAIS supplied cars by customers on account of violation of these provisions, all IAIS owned or leased cars must be clean

and suitable for immediate reloading. On shipments where the party unloading the car refuses or fails to remove all such lading and securing devices, secure interior loading devices and close doors, IAIS shall bill to the original shipper/Consignee served by IAIS a penalty charge of \$200.00 per car, plus the actual cost by IAIS to remedy the situation.
